

EMR Hub

Executive Summary

Working with Medicity – an innovator in health information exchange (HIE) technology – HCA is pleased to offer your practice several options to obtain your patient data electronically. Using the hCare Hub, we are now able to offer a variety of electronic solutions. Using one of these options will provide flexibility for your practice to take advantage of this technology regardless of your current EMR status.

Available options

File Delivery

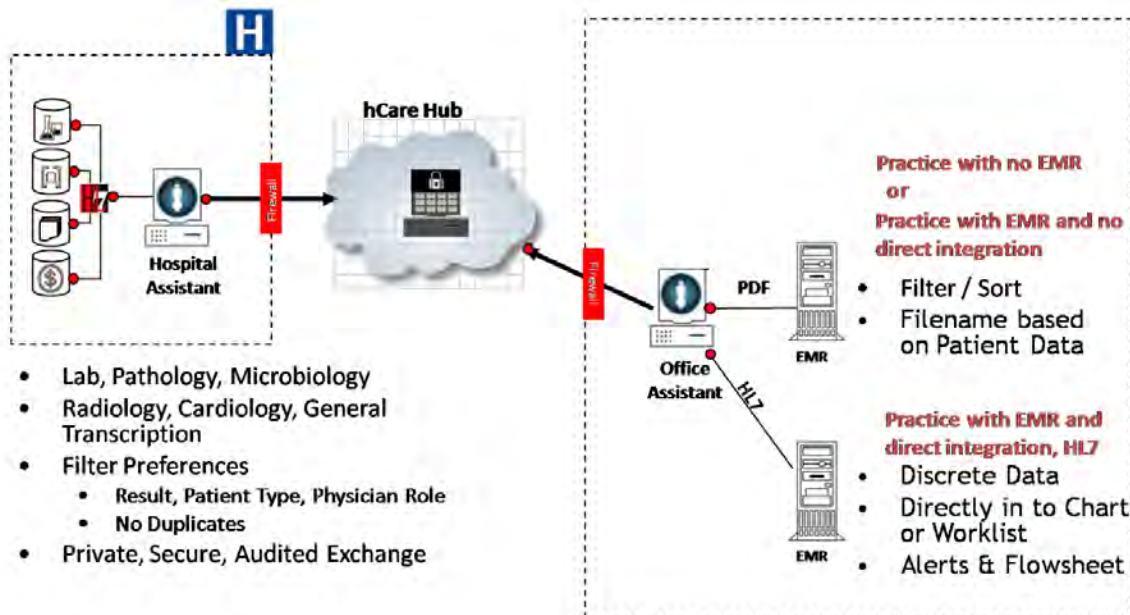

Results/Reports are delivered electronically to your practice in a PDF file format. This allows end users to view the data, print results, or even manually import the data into your office EMR. File delivery can be used in conjunction with an EMR or as a standalone results delivery solution.

EMR HL7 Integration

For physician practices with established EMR's, hCare Hub will integrate patient demographic information, patient results, and transcribed reports to approved EMR solutions providing real time data to physician practices.

Benefits for Physicians

- Facilitates excellent patient care by combining your practice's EMR information with patient visit information from HCA facilities. Creates the electronic health record for your practice.
- Reduces time spent accessing or requesting patient information from HCA facilities.
- Eliminates lost faxed information and can reduce additional paper patient records.

Contact Information
